<ul style="list-style-type: none">Developed dynamic CNCTrain Portal, lead the team on portal and a team player with good interpersonal skills.	

PROJECTS

User Card Info (NodeJS & React API)

- API request to fetch all users in Redux Store using List Users API Endpoint and added button for each user.
- On clicking the button, without event listeners retrieved that users data only using Single User API Endpoint.
- Created a loading indicator to show that the API request is in progress.

Blog Application (MERN Stack)

- Developed with user authentication, CRUD operations for posts, commenting, liking, and a user dashboard.
- Implemented responsive design with comprehensive CSS for optimal user experience.

Salesforce Shape Simulator

- Display user selected combination of shape & color and added blink animation on click.
- Used Custom Events, Shadow Dom for communication between one parent and two child components.

LANGUAGES AND TECHNOLOGIES

- Programming Languages – C++ & JavaScript
- Web Technologies – ReactJS, NodeJS, MongoDB, REST API & LWC
- Database Languages - SQL Server.
